

AIREX® SEGMENTED REFLECTIVE OVERVIEW

Safe Reflections' Airex® is a pioneer in segmented trim. We take pride in being the inventor and patent holder of segmented trims, and our commitment lies in constant product enhancement and unparalleled customer support. Collaborating with uniform manufacturers and suppliers, our SRI Labs team ensures the best fit and consistent quality.

AIREX® FIRE COAT SEGMENTED REFLECTIVE TRIM

Airex® segmented trim is a bright twist in workwear visibility. Our silver and yellow-silver-yellow segmented reflective technology provide excellent visibility in low light conditions, while vibrant yellow or orange fluorescence is ideally suited for garments demanding high visibility in daytime use. Airex® trim is lightweight, flexible, and ensures a more comfortable fit. Its enhanced mobility works well with today's stretch technology in occupational fabrics. Airex® trim underscores our commitment to safety and wearability, ensuring workers remain comfortable and visible while performing their jobs.

CUSTOMER FOCUSED OPTIONS

- High brightness silver reflective material
- High visibility fluorescent combination options
- Designed to work on a wide variety of fabrics
- Multiple wash performance levels
