

XETM

COLOR TRANSFER

XE COLOR TRANSFER OVERVIEW

Safe Reflections new XE Color TransferTM technology provides the ability to easily apply graphic color heat transfers to a wide range of applications through the same TribondexTM adhesives we use in our silver reflective transfers. These high quality color transfer can display your brand identity in durable FR, Home Wash, Industrial Wash, and dye blocking technology options.

THE DIFFERENCE OF XE COLOR TRANSFERTM

- Wide range of color branding capabilities
- Fabric dye blocking technology
- Superior wash performance
- FR version available
- Colorfast transfers with soft hand
- Military use performance

BENEFITS

- **Self Weeding** - Reduces the added cost of labor in vinyl and cut transfer making by eliminating weeding
- **Eco-Friendly** - Color with over 50% reduction of waste and materials during transfer manufacturing
- **Package Savings** - Efficient packaging options allows for reduced handling and storage
- **Home Wash Durability**

COMPLIANCE

- Berry Compliant
- Oeko-Tex Compliant
- REACH Compliant
- NFPA Compliant

FABRIC DRIVEN PERFORMANCE

THE XE DIFFERENCE

INDUSTRY LEADING TRANSFER INTRICACY

- 40% smaller line weights enable enhanced detail and resolution - perfect for ® and ™
- Complex artwork compatible with no additional labor required
- Crisp, clean, straight lines every time with no laser residue

25% FASTER LAMINATION TIME

- Fewer process steps when compared to laser transfers
- Expedited process time
- Up to 30% less expensive than traditional reflective heat transfers when compared to digitally cut parts

UNMATCHED DURABILITY

- 50 warm washes (40°C)
- 25 hot washes (60°C) on some fabrics, testing is required

MAXIMUM STORAGE FLEXIBILITY

- 24-month shelf life

Designed for general use on polyester, cotton and poly/cotton blends.
