

XE TRANSFER™ OVERVIEW

Safe Reflections new XE Transfer™ technology provides the ability to easily apply reflective graphic heat transfers to a wide range of applications through our Tribondex™ adhesives. XE Transfer™ offers the same high-definition appearance as high quality laser and die cut parts and is an effective silver reflective solution for high volume applications.

THE POWER OF SAFE REFLECTIONS XE TRANSFER™

Produced by Safe Reflections and based on reflective bead carrier technology and our own proprietary Tribondex™ adhesives, XE Transfer™ is a high brightness, eco-friendly, and self weeding product.

BENEFITS

- **Self Weeding** - Reduces the added cost of labor in transfer making by eliminating weeding
- **Eco-Friendly** - Reflective with over 50% reduction of waste and materials during transfer manufacturing
- **Package Savings** - Efficient packaging options allows for reduced handling and storage
- **Brightness** - Reflective beaded carrier technology has an initial brightness of 500R_A
- **Home Wash Durability**

COMPLIANCE

- ANSI Compliant
- Berry Compliant
- Oeko-Tex Compliant
- REACH Compliant

THE XE DIFFERENCE

INDUSTRY LEADING TRANSFER INTRICACY

- 40% smaller line weights enable enhanced detail and resolution - perfect for ® and ™
- Complex artwork compatible with no additional labor required
- Crisp, clean, straight lines every time with no laser residue

25% FASTER LAMINATION TIME

- Fewer process steps when compared to laser transfers
- Expedited process time
- Up to 30% less expensive than traditional reflective heat transfers when compared to digitally cut parts

UNMATCHED DURABILITY

- 50 warm washes (40°C)
- 25 hot washes (60°C) on some fabrics, testing is required

MAXIMUM STORAGE FLEXIBILITY

- 24-month shelf life

Designed for general use on polyester, cotton and poly/cotton blends.
